

X HEIGHT REDUCTION AND COVERING

The JIVARO is a machine for closing prepared cartons, which automatically adjusts the height of the carton to its filling height in order to reduce the shipping volume.

This reduction also ensures that multi-orders in particular are packed securely and stably.

The JIVARO systems ensure effective, high-quality packaging in response to the problem of cost/shipping volume.

The packaging process is 100% automated and significantly reduces shipping and labor costs.

Save up to 50 % of the shipping volume and use a reliable, cost-effective and ecological technology that even offers you the option of customizing your parcels.

Product features:
Min: 280 x 180 x 60 mm
Max: 620 x 420 x 430 mm

Weight
max. weight of box 32 kg

Capacity
max. 840 boxes / h

JIVARO PRINT

The JIVARO® PRINT module is particularly suitable for multi-brand logistics companies and all companies that want to design packages individually for each customer.

With the help of an inkjet printer the print module enables the printing of customized lids for any brand or customer.
